

PERFUMIA – Luxury Perfume Shopping Website

1. Introduction

Perfumia is a responsive e-commerce website developed using HTML, CSS, and JavaScript. The website allows users to browse luxury perfumes, add products to a shopping cart, view selected items, and calculate the total purchase amount. The project demonstrates fundamental web development concepts including user interface design, responsive layouts, and client-side cart management

2. Technologies Used

HTML

Used to create the structure of the web pages including the header, hero section, product cards, shopping cart, and footer.

CSS

Used for styling the website, creating layouts, responsive design, animations, hover effects, and overall visual appearance.

JavaScript

Used to implement dynamic functionalities such as:

- Adding products to the cart
- Removing products from the cart
- Updating cart count
- Calculating total price
- Opening and closing the cart sidebar

Code:

```
``html
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
